PROCEDURES FOR STUDENTS PLACED IN ISOLATION
WITH
INFLUENZA (H1N1) SYMPTOMS
Fall 2009

If the Health Center determines you need to be in isolation you should make every effort to get home. You should stay home until you have been free from fever (over 100 F) for at least 24 hours without assistance of fever reducing medications. Please be sure to contact the Student Health Center (215-489-2252) before returning to DVC.

If you cannot go home you will be assigned by the Student Health Center to live in one of our two isolation areas: The Goldman Apartment (5-6 students) or South Hall Phase II (4-6 students), Suite 350A/B. You will need to stay in these areas until excused by The Student Health Center. While there the school will provide:

1) Daily visits from The Health Center
2) Food delivered from Dining Services, three times per day
3) Additional food provided such as crackers, soup, juice and water
4) Housekeeping on a timely basis
5) A television, telephone and internet connection

While in the isolation area you will not be able to:
1) Go in and out to any other areas on campus, go to classes, activities, practice or games
2) Have friends, guests or family members visit (unless family members come to take you home).

We ask that while in the isolation area you:
1) Clean up after yourself as best as you can
2) Be considerate of the others who are with you and also sick
3) Noise level should be kept down
4) Lights out at a reasonable time

Below is a check list of what you should bring:
- Blankets, pillows and pillow cases (sheets provided)
- Text books, other reading materials
- Comfortable clothing for 5-7 days (use a suitcase if you have one)
- Cell phone
- Computer
- Any medications you take
- Your eye glasses
- Toiletries
- Anything else that you want to have with you for 5-7 days to make your “stay” as comfortable as possible.
