

DELAWARE VALLEY COLLEGE

FOOD SYSTEMS INSTITUTE :: SEMINAR SERIES :: FALL 2014

FOOD SYSTEMS IN THE CLASSROOM

Tuesday, November 18, 2014 @ 6:00-7:30 PM

Delaware Valley College's Moumgis Auditorium

This Event is Free and Open to the Public

EVENT DESCRIPTION

Our panel of traditional and non-traditional educators will discuss Food and Agricultural Education within the K-12 learning environment and describe the innovative teaching strategies and learning technologies currently being used in their programs.

FEATURED SPEAKERS

Mary McDonald, *Tamanend School District*

Joey Rider-Bertrand, *STEM Educator, Lancaster Lebanon IU 13*

Tonya Wible, *The Mobile Ag Ed Lab, Pennsylvania Farm Bureau*

FOOD SYSTEMS encompass the entire range of activities involved in the production, processing, marketing, consumption, and disposal of goods that originate from agriculture, forestry, or fisheries, including the inputs needed and the outputs generated at each of these steps. Food systems also involve the people and institutions that initiate or inhibit change in the system, as well as the socio-political, economic, and technological environment in which these activities take place. Delaware Valley College's **Food Systems Institute** is made up of a group of faculty and staff who are interested in ensuring our students from all majors gain an understanding of the whole food system, from seed to nutritional benefits, via agriculture production, food processing, and social and political influences.
